1. INTRODUCTION

1.1 SESAR

SESAR is the technological pillar of the EU's Single European Sky policy and a key enabler of the European Commission's Sustainable and Smart Mobility Strategy. SESAR defines, develops and deploys technologies to transform air traffic management in Europe.

1.2 The SESAR 3 Joint Undertaking

The SESAR 3 Joint Undertaking (SESAR 3 JU) is established under Council Regulation (EU) 2021/2085 as an institutionalised European partnership between private and public sector partners to accelerate through research and innovation the delivery of the Digital European Sky. To do so, it is harnessing, developing and accelerating the take-up of the most cutting-edge technological solutions to manage conventional aircraft, drones, air taxis and vehicles flying at higher altitudes.

1.3 Digital European Sky Programme

The SESAR 3 JU is responsible for implementation of the Digital European Sky Programme and operates an innovation pipeline towards deployment, by also demonstrating the viability of the technological and operational solutions, in larger and more operationally-integrated environments.

The Strategic Research and Innovation Agenda (SRIA) for the SESAR 3 JU presents the strategic research and innovation (R & I) roadmaps for the years 2021 to 2027 to deliver on the implementation of the Digital European Sky by delivery of a Programme of the same name (i.e. fully scalable services supported by a digital ecosystem minimising the environmental footprint of aviation), including the integration of drones, matching the ambitions of the ‘European Green Deal’ and the ‘Europe fit for the digital age’ initiative. The activities outlined in the SRIA to build a digitalised infrastructure are also critical for a post-COVID recovery, enabling aviation to become more scalable, economically sustainable, environmentally efficient and predictable.
